PROFESSIONAL SUMMARY

Innovative **Software Engineer** specializing in the intersection of **Enterprise Systems (Oracle APEX)** and **Artificial Intelligence (RAG, LLMs)**. Expert in transforming complex business requirements into elegant, high-performance solutions. Proven track record in building scalable ERP modules, AI-powered automation workflows, and pixel-perfect Jasper reporting. Dedicated to a minimal, sober design aesthetic and future-proof backend architecture.

CORE COMPETENCIES

- **Enterprise Oracle Stack:** Oracle APEX, SQL, PL/SQL, Oracle Cloud Infrastructure (OCI), Jasper Reports, Toad.
- **AI & Intelligence:** Agentic Workflows (LangChain, OpenAI SDK), RAG (ChromaDB), Ollama, Python (FastAPI, Django).
- **Modern Full-Stack:** TypeScript, Node.js, Next.js, React.js, React Native, RESTful APIs, GraphQL.
- **DevOps & Tools:** Docker, CI/CD, AWS, Supabase, Firebase, Git, Postman.

PROFESSIONAL EXPERIENCE

Oracle APEX & SQL/PLSQL Developer | *Multi Techno* | June 2025 – Present

- **Enterprise Solutions:** Engineering interactive web applications and complex dashboards using Oracle APEX and Jasper Reports.
- **Backend Architecture:** Designing optimized PL/SQL packages, functions, and triggers to automate enterprise workflows and data processing.
- **UI/UX Modernization:** Implementing custom JavaScript and CSS to deliver a "Pinterest-style" minimal and sober user interface for legacy data systems.
- **Integration:** Developing RESTful API bridges to connect Oracle environments with external modern web services.

Artificial Intelligence Developer | *FISTA* | Dec 2024 – April 2025

- **Agentic AI:** Developed intelligent agent workflows using OpenAI Agents SDK and LangChain for automated document reasoning.
- **RAG Implementation:** Built Retrieval-Augmented Generation (RAG) solutions using Next.js and FastAPI, allowing real-time interaction with local LLMs.

Web Developer | *GR Agro Services* | Nov 2023 – Oct 2024

- **Vertical SaaS:** Built a comprehensive digital ecosystem for agricultural fertilizer distribution, featuring dealer management and product-tracking modules.
- **Performance:** Optimized database queries in MySQL/PHP to handle high-traffic product listings and location-based dealer searches.

TECHNICAL PROJECTS

Enterprise ERP & Intelligence Suite

- **Architecture:** Engineered a full-scale ERP ecosystem designed for high-volume inventory, procurement, and logistics management using Oracle APEX and OCI.
- **Backend Engineering:** Developed a robust database layer using Complex Triggers, Stored Procedures, and PL/SQL Functions to enforce data integrity and automate high-level business logic.
- **Performance Engineering:** Executed rigorous Query Tuning and indexing strategies to maintain sub-second performance across datasets involving millions of records.
- **Data Visualization:** Crafted high-performance Visual Dashboards with interactive charts and real-time analytics to track critical KPIs and supply chain health.
- **Automated Reporting:** Integrated Jasper Reports with complex, parameter-driven queries for pixel-perfect automated PDF invoicing, inventory audits, and financial statements.

SugarEase: AI-Powered Diabetes Management Ecosystem

- An intelligent health-tech solution designed for real-time glycemic monitoring and dietary management.
- **AI Vision Integration:** Implemented an AI-based food recognition system using computer vision to automatically calculate nutritional intake and insulin requirements.
- **Architecture:** Built with React Native and integrated with AI models via RESTful APIs for predictive health analytics.

Cognitive Task Engine (RAG)

- A smart task prioritization web app that utilizes local LLMs and ChromaDB for privacy-first data processing.
- **Tech:** React, Ollama, LangChain, FastAPI.

EDUCATION

Bachelor of Science in Computer Science | Aug 2021 – Aug 2025

- **Honors:** 3rd Position in Undergraduate BSCS.

CERTIFICATIONS

- **Oracle APEX & SQL/PLSQL Developer** – Oracle Learning

- **Master LangChain and Ollama: Chatbots & Agents** – Udemy
 - **React - The Complete Guide 2026** – Maximilian Schwarzmüller
 - **Introduction to Computer Science (CS50)** – Harvard University
-

AWARDS & CO-CURRICULAR

- **Merit Scholarship:** Awarded for excellence during GCE A-Levels (Beaconhouse).
- **Languages:** English (Fluent), German & Chinese (Basic Proficiency).
- **Interests:** Table Tennis, Swimming, and Chess.
