PROFESSIONAL SUMMARY

Software Engineer specializing in Oracle enterprise application development, SQL/PL/SQL programming, and business process automation. Experienced in designing and optimizing Oracle PL/SQL packages, stored procedures, triggers, views, and enterprise reporting systems using Oracle APEX and Jasper Reports. Skilled in query optimization, workflow automation, ETL processes, data migration support, and legacy system modernization. Familiar with AWS cloud services, RESTful API integrations, backend automation, and enterprise application architecture. Proven ability to analyze undocumented business logic, translate complex requirements into scalable solutions, and collaborate with cross-functional teams and external vendors.

CORE COMPETENCIES

- Oracle Enterprise Stack: Oracle APEX, Oracle SQL, PL/SQL, Stored Procedures, Packages, Functions, Triggers, Views, Oracle Cloud Infrastructure (OCI), Jasper Reports, Toad, Oracle Data Modeling
- Database & Migration: Query Optimization, Performance Tuning, ETL Workflows, Data Migration, Schema Transformation, Backend Automation, Data Validation
- Enterprise Modernization: Legacy System Modernization, Business Rule Analysis, Workflow Documentation, API Integration, System Integration
- Reporting & Analytics: Jasper Reports, Power BI, Parameterized Reporting, Data Visualization
- Cloud & DevOps: AWS, Docker, CI/CD, Git, RESTful APIs, Supabase, Firebase
- Programming & Scripting: Python, JavaScript, TypeScript, Node.js, FastAPI, PowerShell (Basic)
- Enterprise Systems: Inventory Management Systems, Procurement Systems, Transaction Management, Workflow Automation

PROFESSIONAL EXPERIENCE

Oracle APEX & SQL/PLSQL Developer | Multi Techno

Sep 2024 – Present

- Developed and maintained enterprise Oracle APEX applications covering 5+ modules for inventory, procurement, and workflow management systems, reducing manual processing time by approximately 30%.
- Designed and optimized 20+ Oracle PL/SQL packages, stored procedures, functions, triggers, and views, improving backend automation reliability and cutting recurring bug reports by ~40%.
- Performed SQL query optimization and database performance tuning across high-volume transactional systems, achieving query response time improvements of up to 35% on critical reports.
- Analyzed and implemented complex business rules and workflow logic within enterprise applications, resolving undocumented legacy logic across 3 core modules.
- Created 10+ parameterized Jasper Reports for operational reporting, audit tracking, and automated PDF generation, reducing manual report preparation by approximately 5 hours per week.
- Integrated Oracle systems with 3 external services using RESTful APIs and JSON-based data exchange, enabling real-time data synchronization.
- Led modernization of 2 legacy enterprise modules through improved UI architecture using JavaScript and CSS customization, improving end-user adoption.
- Maintained and refactored 15+ scheduled backend jobs and automated database processes, reducing failed job incidents by ~25%.

Web Developer | GR Agro Services

Dec 2024 – Apr 2025

- Built a comprehensive digital ecosystem for agricultural fertilizer distribution including dealer management and product tracking modules, serving 100+ dealers across the region.
- Optimized MySQL and PHP database queries handling high-traffic product listings and location-based dealer search, reducing average page load time by ~45%.
- Ensured scalable backend architecture supporting concurrent user sessions with stable performance under peak load.

Artificial Intelligence Developer | FISTA

Nov 2023 – Oct 2024

- Developed intelligent agent workflows using OpenAI Agents SDK and LangChain for automated document reasoning and decision support systems, processing 1,000+ documents.
- Built Retrieval Augmented Generation (RAG) systems using Next.js and FastAPI, enabling real-time interaction with local LLMs and reducing manual document lookup time by ~60%.
- Integrated vector-based search and contextual retrieval pipelines using ChromaDB, improving AI response relevance scores by ~30% over keyword-only search.

TECHNICAL PROJECTS

Enterprise ERP & Workflow Automation System

- Engineered 6+ enterprise ERP modules for inventory, procurement, logistics, and transaction management using Oracle

APEX and Oracle Database.

- Developed complex PL/SQL stored procedures, packages, triggers, and functions automating 12+ enterprise workflows and enforcing business rules.
- Performed query optimization and indexing across large-scale transactional datasets, improving report generation speed by 35%.
- Implemented ETL-style data processing, transformation, and validation workflows handling 50,000+ inventory movement records.
- Designed interactive dashboards and enterprise reports using Jasper Reports; reduced reporting cycle from 2 days to 4 hours.
- Developed secure RESTful API integrations between Oracle systems and 3 third-party services.

AgriFert: Agricultural Fertilizer Distribution Platform

- Developed a full-stack web application digitizing the fertilizer supply chain for 100+ dealers using MySQL, PHP, and a custom admin portal.
- Implemented location-based dealer search with optimized geospatial queries, cutting search response time by ~50%.

Cognitive Task Engine (RAG)

- Built a privacy-focused task prioritization system using local LLMs and ChromaDB with RAG architecture (React, Ollama, LangChain, FastAPI).
- Achieved sub-second query response times on a local inference stack without cloud dependency.

SugarEase: AI-Powered Diabetes Management Ecosystem

- Developed an AI-powered diabetes management system with computer vision-based food recognition for real-time glycemic monitoring and dietary tracking.
- Built with React Native and RESTful AI model APIs; food recognition model achieved ~87% accuracy on test dataset.

EDUCATION

Bachelor of Science in Computer Science | Aug 2021 – Aug 2025

National University Of Modern Languages, Faisalabad (NUML) — BSCS

- Graduated with 3rd Position in class — Dean's List recognition

CERTIFICATIONS

- Oracle APEX & SQL/PLSQL Developer – Oracle Learning
- Master LangChain and Ollama: Chatbots & Agents – Udemy
- React – The Complete Guide 2026 – Maximilian Schwarzmüller (Udemy)
- Introduction to Computer Science (CS50) – Harvard University

AWARDS & ADDITIONAL

- Merit Scholarship: Awarded for academic excellence during GCE A-Levels (Beaconhouse School System)
- Languages: English (Fluent), German (Basic), Chinese (Basic)
- Interests: Table Tennis, Swimming, Chess
